

Program	Program NUCLEU PN 16-25.03.05 – in derulare
Project title (ENG):	Biological removal of inorganic nitrogen compounds from raw water intended for human consumption
Project title (RO):	Eliminarea pe cale biologica a compusilor anorganici ai azotului din apa bruta destinata consumului uman
Duration	2016-2017
Team Leader	Eng. Viorel Patroescu
Summary (short description) ENG	The project achieved assessing the influence of operating parameters on the denitrification rate in a fixed bed biological filter and will achieve, in the course of 2017, assessing the influence of operating parameters on the rate of denitrification of a fluidized bed biofilter
Summary (short description) RO	Proiectul a realizat evaluarea influentei parametrilor de operare asupra vitezei de denitrificare a unui filtru biologic in strat fix si va realiza, in cursul anului 2017, evaluarea influentei parametrilor de operare asupra vitezei de denitrificare a unui filtru biologic cu strat fluidizat
