

Program	Program NUCLEU PN 06 12 01 09
Project title (ENG):	Elaboration and "in-house" validation of analytical methods for determination of Cd, Ni and Pb mobile forms in soils and sediment with different morphological structures. Studies and research on the mercury availability in sediments.
Project title (RO):	Elaborarea si validarea "in-house" a unor metode analitice pentru cuantificarea formelor mobile ale Cd, Ni si Pb din soluri si sedimente cu structuri geomorfologice diferite. Studii si cercetari privind disponibilitatea mercurului din sedimente.
Duration	2006-2008
Team Leader	Senior Researcher Eng. Gabriela Vasile
Summary (short description) ENG	The project includes the extraction methods for Cd, Ni, Pb and Hg mobile metallic forms from anthropic solid environmental samples, metals included in the priority substances list, metals with negative impact on the environment and human health. In the project were validated "in-house" simple chemical extraction and determination methods for Cd, Ni, Pb and Hg mobile metallic compounds using flame atomic absorption spectrometry, metals extracted from highly polluted soils and sediments with different morphological structures. It has established an uninterrupted chain of traceability of analytical measurements to avoid geo-morphological changes in the structure of soils and sediments, due to redistribution of metals between the solid phases.
Summary (short description) RO	Proiectul include stabilirea metodelor de extractie a formelor metalice mobile ale Cd, Ni, Pb și Hg din probe solide de mediu puternic antropizate, metale incluse în categoria substanțelor prioritare periculoase cu impact negativ asupra mediului și sănătății umane. S-au elaborat și validat "in-house" metodele de extractie chimică simplă și determinare a formelor mobile ale compușilor metalici cu Cd, Ni, Pb și Hg prin spectrometrie de absorbție atomică în flacără din soluri și sedimente cu structuri geomorfologice diferite. S-a stabilit un lant neintrerupt al trasabilitatii măsurărilor analitice în scopul evitării modificărilor în structura geomorfologică a solurilor și sedimentelor, datorită redistribuirii metalelor între fazele solide.
Dissemination of results	
PhD Thesis – Title RO, ENG	Monitorizarea concentratiilor speciilor metalice mobile din soluri si sedimente antropizate. Trasabilitatea masurarilor analitice de metale mobile in soluri si sedimente, Gabriela Vasile, 2010 Monitoring of concentrations of mobile metallic species from anthropogenic soils and sediments. Traceability of analytical measurements of mobile metals in soils and sediments
